Windows Small Business Server 2008 (SBS 2008) is an all-in-one server solution designed to help you keep your data more secure and your company more productive. Some of its features include:

- **Email**
- **Support for Mobile Devices**
- **Internet Connectivity**
- **File & Printer Sharing**
- **Internal Web Sites**
- **Backup & Restore**
- **Remote Access**

SBS 2008 boosts productivity in the office, at home and on the road - it helps gets business done. SBS 2008 delivers a range of exciting new features and capabilities for small business owners and employees, as well as IT managers and technology consultants. There are several reasons to make the switch:

- **Local Email Management:** SBS 2008 includes Microsoft Exchange 2007, providing for internal management of your organization's email, keeping your internal email private and freeing up network bandwidth in the process.
- **Greater Security & Data Protection:** SBS 2008 includes built-in antivirus and anti-spam. The administrator controls individual access (people and computers), including log-in and workflow methods.
- **Simple Online Marketing Presence:** SBS 2008 integrates with Microsoft Office Live Small Business to simplify setup and management of professional web sites and private work spaces.
- **Better Productivity:** SBS 2008 has a streamlined, customizable remote web workplace integration with Windows SharePoint Services 3.0 and support for Windows mobile devices, helping employees more effectively work remotely and collaboratively.
- **IT Made Easy:** Deployment, setup, and administration is simplified and improved, saving time, money and effort. SBS 2008 licensing is more flexible and cost effective.
- **Manageability:** SBS 2008 has a streamlined administration console; monitoring across servers and client PCs; and customizable, remotely accessible reports make management and troubleshooting easier and more effective. Adding users and computers is faster.
- **Newest Technologies:** SBS 2008 delivers a powerful, more secure infrastructure that is user friendly with added efficiency.
- **Go GREEN:** SBS 2008 saves energy in comparison to previous models, reducing if not eliminating paper use. The Dell PowerEdge Server, for example, uses 25% less energy; for equipment that runs 24/7, that's big savings!
